

16th STUDENT CONGRESS OF THE SOCIETY OF CHEMISTS AND TECHNOLOGISTS OF MACEDONIA

On October 27–28, 2025, the 16th Student Congress of the Society of Chemists and Technologists of Macedonia (SCTM) was successfully held at the Faculty of Technology and Metallurgy in Skopje.

Throughout the two congress days, seven invited lecturers shared parts of their research with the students. Among them were four lecturers from Ss. Cyril and Methodius University in Skopje, as well as representatives from Goce Delčev University in Štip, the University of Opole, Poland, and the pharmaceutical company Alkaloid AD Skopje.

In addition, 51 students from various study cycles presented their scientific and research results in the fields of chemistry, chemical engineering, and technology. The participants represented Macedonia, Serbia, Poland, Azerbaijan, Croatia, Bulgaria, and Kosovo, contributing to a truly international exchange of knowledge and ideas. Presentations covered a broad range of subjects, from materials science to nanomaterials, green chemistry, and pharmaceutical innovations, demonstrating the participants' creativity, dedication, and scientific excellence.

We extend our sincere gratitude to all participants who enriched the Congress with their work and presentations, to the Faculty of Technology and Metallurgy and the Faculty of Natural Sciences and Mathematics, as well as to the commercial sponsors for their valuable support, and to the organizational and scientific committees for their dedication and effort in making this event a success.

We hope this Congress will remain a memorable and inspiring experience for all who took part, and we eagerly anticipate an even bigger and more vibrant event in two years.
